16 500 € All Tax Included

Description

Jeanneau Albatros 750 of 1990:

Equipped with a Volvo Penta Diesel TAMD 41 of 200 horsepower shaft line. Only 600 engine hours,

The Albatros 750 was designed to face bad weather, its hull is well balanced, with semi-lift displacement.

Its bow is strongly defended to pass the waves smoothly.

The keel reinforces the qualities of the hull. The advantages of this hull shape are inherent to your comfort at sea such as: stability at anchor and at full speed.

The ergonomic cockpit easy to maintain, deep and clear is designed to stall against the coaming (two removable rear seats)

This boat is really suitable for long days of idleness.

Two huge lockable bunkers with racks for rods contribute to perfect the whole. The passages on the front are easy: wide passageways and ensured by a long handrail on the cap, stainless steel balcony of the bow up to the height of the interior cockpit

The Albatross 750 is very complete with square transformable in double berth, kitchen behind the cockpit. The height under barrot is 1.90 m, the very bright square provides an excellent panoramic view, an additional asset for the cockpit. the fresh air ventilation is dosed from the sliding glass double position forward and backward and the deck panel.
