Description

Top Speed: Reaches 30–35 knots. Cruising Speed: It is between 23 and 25 knots, a regime at which the boat offers the best compromise between fuel consumption and sailing comfort.

Behavior on the Wave: The deep V hull (typical of overseas projects) cuts the wave cleanly.

The heavy hull and high side walkways deflect splashes sideways, keeping the cockpit completely dry even in strong winds and cross waves.

Anchoring stability: Thanks to the width of 2.74 meters and the geometries of the static support skates, the boat significantly reduces roll during drift or angling sessions
