Description

For decades, the Erio Matteri Shipyard has represented craftsmanship excellence in the construction and restoration of fine traditional wooden boats on Lake Como.

An example of this is the Gozzo 700 Portofino, a fiberglass fin model made by the Como shipyard that is characterized by the classic lines typical of the Mediterranean tradition.

This model, launched in 2009, is in excellent general condition thanks to a major refit carried out in 2025.

Ideal boat for both day trips immersed in comfort and luxury both at sea and lake.

A boat that can be driven without a boat license and, therefore, easy to use thanks to a valid hull that allows stable and relaxing navigation.
