Description

Felci 71

Designed by renowned naval architect Umberto Felci and built by C.N. Yacht 2000, the Felci 71 is a semi-custom performance cruising yacht combining outstanding sailing performance with genuine bluewater cruising capability.

Built in advanced GRP, carbon and Kevlar composite construction, she offers an excellent balance between structural strength, reduced displacement and exceptional sailing efficiency. Her elegant hull lines, deep fixed keel, carbon Max Spar mast and rod rigging provide rewarding performance in both light airs and stronger offshore conditions while remaining remarkably manageable with a small, experienced crew. The interior accommodates up to 10 guests in four cabins, complemented by two separate crew cabins with independent access. Finished in warm timber joinery, the yacht offers generous living spaces together with a practical cruising layout and a comprehensive specification including air conditioning, generator, watermaker, dishwasher, washing machine, dryer and extensive onboard equipment for comfortable long-range cruising. Professionally maintained throughout her life, she has benefited from numerous important upgrades including a zero-hour engine overhaul, renewed electrical systems, updated navigation electronics, new sail inventory, Starlink connectivity and many further improvements, reflecting consistent ownership and careful maintenance.

The Felci 71 remains one of Umberto Felci's most successful performance cruiser designs, combining timeless Italian styling with excellent sailing characteristics and outstanding offshore capability. Opportunities to acquire well-maintained examples of this model are increasingly rare.
