Description

ASTONDOA 39 FLY – 2001 – Polish Flag – Former Spanish Flag – EU VAT Paid – Available for Viewing in Barcelona

The Astondoa 39 Fly is one of the most respected flybridge cruisers built by the renowned Spanish shipyard Astondoa, appreciated for its solid construction, excellent seaworthiness and generous interior volumes. This 12.80-metre yacht is currently registered under the Polish flag and was previously registered under the Spanish flag. She is offered with EU VAT paid.

Launched in 2001, the yacht has benefited from meticulous maintenance since her acquisition at the end of 2023. More than €35,000 has been invested to keep her in excellent mechanical and cosmetic condition. All maintenance invoices and a complete file of the work carried out are available.

Power comes from twin Volvo Penta TAMD63P 370 HP diesel engines with approximately 1,150 engine hours. In 2025 both engines underwent a comprehensive overhaul including complete turbocharger refurbishment, heat exchanger cleaning, injector servicing, shaft line maintenance, replacement of the steering ram and port alternator, as well as full fuel tank decontamination. New impellers and a new Victron battery charger were installed in 2026.

The yacht features stainless steel shafts, four-blade propellers, power-assisted hydraulic steering, a bow thruster, Trim Master trim tabs and dual helm stations at both the lower helm and the flybridge, ensuring easy and precise manoeuvring.

The interior was completely refurbished in 2024 with new upholstery, renewed carpets and full LED lighting. Accommodation includes two cabins sleeping up to six guests, featuring a forward owner's cabin with a central double berth and private bathroom with separate shower. The bright L-shaped saloon also offers a convertible sofa.

The galley is fully equipped with a Teka induction hob, refrigerator, microwave/grill, double stainless-steel sink, ice maker and ample storage.

Comfort equipment includes reversible air conditioning, heating, TV, Bluetooth stereo, Google Home, USB and USB-C charging ports, shore power connection, Victron Connect monitoring system, EcoFlow DELTA Pro portable power station, EcoFlow 400 W solar panel and onboard Wi-Fi.

Navigation equipment features complete Raymarine electronics including colour radar, autopilot, depth sounder, VHF with flybridge repeater, compass and compatibility with Navionics and OpenCPN.

Outside, the spacious flybridge, forward sunpad, teak cockpit, teak bathing platform, remote-controlled hydraulic passerelle, Lofrans electric windlass, recent cushions and new cockpit and flybridge covers provide outstanding comfort both at sea and at anchor.

An inflatable tender with a 2.5 HP outboard engine is included in the sale.
