Description

Nuva Boats Nuva M9 used guaranteed, just picked up.

Boat launched in 2025, less than 50 hours of operation. Official Honda warranty until 2031

The Nuva Boats Nuva M9 is one of those boats that, as soon as you get on board, immediately makes you think: "The space here has been exploited really well". It is modern, elegant without being excessive and above all very versatile. In a nutshell, it is the right boat for those who want to enjoy the sea in company, relax in the sun, swim in a beautiful roadstead and, when needed, also have comfortable and protected environments.

This example is guaranteed used and just picked up, so it represents a particularly interesting solution for those who want to avoid the unknowns that often accompany the purchase of a boat from a private individual. Before being proposed, it is carefully checked, so you can approach the purchase with greater serenity and with a professional reference to turn to.

The Nuva M9 measures about 9.20 meters in length and has a width of 2.99 meters: numbers that, once on board, turn into a lot of livability. The deck is wide, open and easy to walk. You don't feel like you're always having to move sideways or having to ask permission from others to pass. Everyone can find their own space, both while sailing and when stopping for a swim or lunch.

One of its strengths is precisely the organization of the external areas. Forward and aft there are areas dedicated to relaxation and conviviality, perfect for lying in the sun, chatting with friends or organizing an aperitif in front of the sea. The spaces can be transformed and adapted to the different needs of the day: sundeck when you want to relax, table area when it's time to eat and free passages when you need more comfort of movement.

The driving area is also well thought out. The position of the pilot allows you to have a good view and to manage the boat intuitively. The walkaround configuration makes moving from bow to stern easier and safer, a feature that is much appreciated when there are children on board, guests who are not used to the boat or simply when you want to live the day without complications.

Below deck, the Nuva M9 surprises because it offers much more than you might imagine when looking at it from the outside. Depending on the configuration, you will find convertible rooms for rest, sleeping places and a separate bathroom. This means that you are not obliged to use it only to go out in the morning and return in the evening: you can also think of a weekend, a night at anchor or a short cruise without giving up the essential comforts.

The outboard engine is another interesting element. The Nuva M9 is normally offered with dual engines, a choice that offers good performance, easier handling in maneuvers and greater peace of mind when sailing. The model has been designed to combine comfort and fun, with cruising speeds suitable for daily commuting and enough performance to quickly reach your favorite bay. The precise characteristics of the engines, the hours of use and the equipment of this example will of course be verifiable in its technical sheet.

Why buy this guaranteed used Nuva M9?

The first good reason is simple: you can buy a recent boat with a current design without facing the full cost of the new one. You take home a modern model, still very desired on the market, but benefiting from the economic advantage typical of second-hand.

The second reason is the warranty. Buying a boat that has just been picked up and checked by a professional operator is very different from concluding a negotiation between private individuals. You have greater protection, you can learn more about the real state of the boat and face the purchase with more confidence.

The third reason is livability. The width of almost three meters, the large outdoor areas and the transformable spaces allow the boat to be used in many different ways. It is good for the couple who likes to be comfortable, for the family who wants to spend the whole day at sea and for the group of friends who are looking for a beautiful, practical and fun boat.

Another advantage is its versatility. The Nuva M9 can be a real day boat, perfect for swimming and aperitifs, but it can also accompany you during a weekend thanks to the interiors, beds and bathroom. You don't have to choose between an open boat and a more habitable boat – here you find a good balance between both.

Then there is the design. The Nuva M9 has modern and recognizable lines, but it is not a boat that goes out of fashion after a season. It's clean, sleek and sporty at the right point. It cuts a fine figure in port, but above all it is designed to be really experienced, without sacrificing practicality to chase only aesthetics.

Finally, buying a newly picked up example can mean having access to an available boat more quickly than ordering a new one. You can view it, directly assess its condition, check the accessories present and immediately understand if it is the right one for you.

Basically, this guaranteed used Nuva Boats Nuva M9 is suitable for those looking for a modern, spacious and easy-to-live boat, but also want to make a reasoned purchase. You have plenty of outdoor space, usable indoor environments, good performance, and the peace of mind of a verified proposal.

It is the classic boat on which you can get on in the morning with the idea of just taking a swim and find yourself on board in the evening, with friends, watching the sunset. And this is probably its greatest merit: it makes you want to really use it, not just keep it beautiful in port.
