Description

The Ariston is the most famous of the motorboats designed by Ing. Riva as well as the longest-lived model in wood production. From 1950 to 1976, 1012 examples were made.

This legendary speedboat features high-quality craftsmanship, with extraordinary attention to detail and the use of the finest materials. The Riva Ariston offers a perfect combination of exceptional performance and luxurious comfort.

Today, the Riva Ariston continues to enchant boat enthusiasts from all over the world, representing a symbol of timeless elegance and craftsmanship. This example, launched in 1958, belongs to the first series of Aristons.

From a construction point of view, the hull is made of marine plywood as well as the sides of lamellar.

The boat is in excellent general condition thanks to the recent works carried out:

- painting (5 coats of paint)
- chrome polishing
- Bottom screw check

The original Chris-Craft engine (correct matching number) has been landed, totally overhauled and brought to 0 hours.
