Description

XBOAT ref :5834.This RM 1125 built in 1991, is an integral dinghy version with side fins, twin rudders with beaching sole. This design and specificity, desired by the architect Bruno DEVRIESE who is known in the nautical community as an expert in the construction and design of sailboats, in particular for his role within Fora Marine, the French shipyard which manufactures RM sailboats . (As an engineer and manager, he contributed to the reputation of the RM Yachts brand, recognized for its high-performance, innovative sailboats built in epoxy plywood), allows navigation in shallow waters (Draught 0.70 /1.70) and easy and safe grounding.

This RM 1125 was built individually under his supervision in 1991 for himself. There are only 4 copies. This RM 1125 has a beautiful forward double cabin, a large saloon under the cockpit, a bathroom, a beautiful, well-appointed kitchen with plenty of storage space (as in all the boat). This boat had a major reconditioning in 2019, including a new hull and deck paint, new anti-slip, a redone electrical circuit, a reconditioned engine, simple and modernized electronics. The lateral drift system is easy to use, and does not require significant maintenance, given that the drift wells are not submerged. A ballast system is installed. The whole boat is very clean, functional for long navigations. Power on board is provided by 3 service batteries maintained by a 150W solar panel.

The RM 1125 offers several distinct advantages, particularly for sailors looking for a combination of performance, comfort, and innovation. Here are the main reasons why the RM 1125 is an attractive choice:
