65 000 € All Tax Included

## Description

Windy are a product of traditional craftsmanship, enhanced with the aid of modern technology for improved performance, greater strength and reduced noise throughout the vessel. ☒ The hull is reinforced with advanced multi axial glass-fibre matting and Divinycell. This allows a reduction in the boats weight of up to 20% whilst offering noticeably improved stability. ☒ All the Windy models are CE-labelled. This means that Windy meets all the requirements laid down for quality control documentation and product liability within the EU. ☒ In the process of obtaining approval, the company has also introduced new methodologies construction principals and more advanced construction production equipment, resulting in more cost-effective and quality oriented processes in-house. ☒ Above all, Windy is a “Boat Builder” and not a manufacturer of boats, a philosophy, which characterizes their production staff and all those within their distribution network.

## Building / facilities description

Below decks, you'll find a well-organized galley to port, equipped with a sink and a diesel hob (eliminating the need for gas onboard or shore power for cooking), along with ample preparation space. Facing the galley is a separate heads compartment with a manual WC and a sink. The forward saloon consists of a large wrap-around dinette with a central table that can be lowered to create a sizable double berth as needed. Ample light and ventilation, along with top-quality materials throughout, ensure your time on board is as comfortable and relaxed as possible. The machinery space is easy to work in, offering plenty of room and straightforward access to main service items. It includes a central lazarette space and storage under the side seating for general cruising equipment. In short, the Windy 28 Ghibli is highly versatile, seaworthy, and fun.
