The ULDB 53 "GATEWAY" is an Ultra Light Displacement Boat (Fast Cruiser) designed by Bill Lee, the undisputed leader in the construction of this type of boat that was very popular between the end of the 80s and 90s. Among her key features we find the lightness of the hull combined with a reduced sail area, for very agile and fast boats, easy to manage. The ULDB 53 "GATEWAY" has a large cockpit with a cozy deckhouse and, inside, 3 cabins with 2 bright and very airy bathrooms thanks to the many portholes. She is well rigged with a mast with three rows of spreaders, carbon spinnaker pole and bowsprit, portable generator, water maker, tracks for the full-batten mainsail, electric winch. "GATEWAY" has always been taken care of and upgraded by her owner. In 2020, rod rigging, sea cocks, engine (with only 320 hours), cover and batteries were replaced. In 2019, new mainsail and genoa were added, while in 2016 two new gennakers. The light grey hull was repainted in 2015. - Check the full brochure, the video and the sea trial on our Web site MEDIA SHIP
