## Description

Dufour Catamarans 48, beautiful design with the Dufour philosophy, inverted bows, giving it a sporty look. Italian Shipyard took over the construction. The Dufour Catamarans 48 maintains the Dufour identity codes, particularly with the lines of the hull and their inserts, the shapes of the portholes, and the deck plan free from any hindrance. The flybridge of the Dufour 48 catamarans is a key element of this project. Elaborated as a second cockpit, the outdoor living space is greatly expanded. The boat is available today, which is a unique opportunity to buy. Photos were taken directly at the dock, and the color of the mattresses can be replaced in the cost of the purchase. Traffic is ideal with access by two stairs through the starboard cockpit and side bridges from the port. It features a low table and is surrounded by wide seats and a large sunbathing area. It also features the driving position. The rudder station offers an absolute advantage in terms of visibility. The large console inspired by superyachts integrates all the equipment in a very ergonomic way. The three mainsail winches, jib, and gennaker are easy to reach. It also benefits the helmsman from an adjustable seat and bimini, available either in canvas or rigid. A functional cockpit as an extension of the living room. The cockpit space of the Dufour 48 is similar to a boat 50 feet or more. In fact, the boat's width of 8 meters provides excellent distribution of space on board. There is a large table for 8 people, multiple seating and relaxation areas, as well as the famous dashboard created by Dufour Yachts. The large French window opens completely for full communication with the lounge area.
